

## SOKymOT

### Low Frequency Clamshell CARDS

**Overview**

The Clamshell Card is a lower cost RFID card solution compared to the more sophisticated ISO Card. It is highly resistant to mechanical stress and the punch-slot allows for an easy fixation on any kind of support.

Different printing options are available. The Clamshell Card provides an excellent reading distance compared to market standards.

**Applications**

- Personal identification
- Building access control
- Hotels
- Recreational Area
- Time & attendance

<b>Clamshell Cards features</b>	
Self Resonance Frequency	125kHz
Dimensions	85.80 x54,00 x1.60mm
Hard shell material	ABS
Cover foil material	PVC
Punch slot	1
ICs technologies	125kHz      Unique (4x02), Q5 (5555) and others on request
Options & Personalization	<ul style="list-style-type: none"> <li>- Printing before (offset) lamination on cover foil</li> <li>- Logo printing using Pad printing (1 colour)</li> <li>- Code number printing (Wiegand, Hexa, Dec and more), using inkjet or laser engraving</li> <li>- Initialisation and encoding</li> </ul>
